Sales Information

Model-Collection „Fire- and Emergency Apparatus“

A large part of the models in scale 1:87/H0 for sale was example-like build in manual work (a.o. example-like truck bodies, technical details, adaptation of types) and „fire-technical“ equipped (a.o. with tools, lacquer, design). Only some models were leave in their original and example-like manufacturers version (may be some detailed adaptations: a.o. vehicle plates, flashlights). The models of the apparatus are essentially based on basic models of the manufacturer Herpa, Roco and Wiking.

Model builder and owner of the collection: Wolfgang Jendsch (contact see above)
